

This vegetable oil complements hair hygiene, protecting, moisturising, and making hair shiny and soft. It strengthens the cuticle and activates hair growth. It minimises the negative effects of dyes, styling, hairsprays, drying, detergents, etc. Its great content in essential fatty acids is very efficient against hair disorders. For best results, apply it before washing the hair and let it act for 10 minutes.

This is a highly versatile and efficient product.

Ingredients and their richness

Cocos nucifera oil • Corylus avellana seed oil • Rosmarinus officinalis leaf extract and Helianthus annuus seed oil
• Salvia officinalis leaf extract • Parfum • Limonene* • Benzyl benzoate* • Linalool* • Geraniol*
(*from its natural essential oils)

Its rich content in **fatty acids** extracted from **Coconut** and **Hazelnut** protects and recovers rough hair and regulates sebum; **Sage** and **Rosemary** extracts improve nourishment during the growth phase of hair, strengthen the cuticle, reduce stress, mitigate itching and stop dandruff. Also enhanced with a **compound of aroma-therapeutic oils** that improves hair flora, most significantly **Ylang Ylang**, which is used by women from Tahiti for their long manes and favours hair growth and strengthening.

Dermocosmetic functions

- ✦ **Extraordinary glow, volume and smoothness**, it also mitigates hair disorders
- ✦ **Protects and strengthens** hair and its cuticle.
- ✦ **Neutralises** the adverse effects produced by **aggressive external agents** (dyes, styling, hairsprays, drying, detergents...)

Indications

Universal, for all hair types
Very dry, frizzy or curly hair
Straight hair with little volume or glow
Seborrheic hair, for its exceptional content in essential fatty acids and liposoluble vitamins
Weak, brittle or damaged hair: breaks or split hairs, excess sun exposure...
Antistatic. Hair rapidly regains its smoothness, facilitating combing
Hair disorders: scabs, dandruff, seborrhea...

Directions for use

Always shake before use. Apply a small dose once a week. Gently massage onto the scalp and dry hair. Let it act 5 to 10 minutes. Wash the hair.

Dose depending on hair type (more amount for dry hair) and season (more during the summer).

To make hairstyling and combing easier for **frizzy, curly and thick** hair, apply also a small dose after washing it, spreading the oil by running your fingers through your wet hair (not the scalp). Let it act.

To wash dry, **grey and very damaged or dull hair**, introduce a spoonful of Oleo-active hair care in a bottle of **Phyto-active shampoo** (210 ml). This mixture protects the scalp and hair, providing incredible shine, smoothness and strength.

In cases of **hair disorders** (scabs, dandruff, seborrhea...), we recommend applying a small dose of Oleo-active hair care on the affected areas of the scalp before washing. Massage gently and slowly with your fingertips. Let it act for 10 minutes. Wash the hair.

If **dyeing, bleaching, highlighting**, or applying **henna** to the hair, add 2 ml. of Oleo-active hair care to these colouring mixes for best results. It will leave hair shiny and recover damaged hair.
