

## Floral waters

### Bio-relaxing complements

Selection of gentle natural scents and exceptionally biological plants in three versions: **Lemon**, **Lavender** and **Vetiver**, with relaxing, de-stressing and toning properties respectively. Wet your skin with a Floral water before applying an emulsion or cream for improved results.

Choice will depend on the effect one wishes to obtain, the type of person, morphology, temperament and mood.

May be sprayed or applied directly with the hands on the skin.

Plants offer active ingredients that could never be obtained by chemical synthesis. **Dulkamara bamboo** knows how to extract and treat them with care in order to provide its consumer with an incredible feeling of wellbeing while enveloped in scents which are as natural as they are unique.

## Lemon floral water

### Ingredients and their richness

Aqua • Melissa officinalis leaf extract • Citrus limonum peel oil expressed • Parfum • Limonene\*  
(\*from its natural essential oils)

**Lemon** has purifying and diuretic effects, is a very useful moisturiser, improves blood circulation and recovers lost minerals; and **Lemon balm**, a white or pink-flower, herbaceous plant that contains rosmarinic and caffeic acids that improve lymphatic circulation. They make this product ideal to relax and soothe the nerves and remedy problems of unease and restlessness.

### Dermocosmetic functions and Indications

- Rejuvenates tissues and is an excellent support for recovery during convalescence
- Reduces facial and cranial tension and gives skin a radiant look
- Pre and post liposuction (prepares and recovers the tissue)
- Abdomen treatments and fighting cellulite
- Varicose veins

Ideal for people with a LYMPHATIC TEMPERAMENT: Quiet character, people who are physically very rounded or retain liquids.

## Lavender floral water

### Ingredients and their richness

Aqua • Crataegus oxyacantha extract • Lavandula angustifolia herb oil • Parfum • Linalool\*  
(\*from its natural essential oils)

**Lavender** active ingredients have antiseptic, anti-inflammatory, healing, sedative and relaxing properties which soothe anxiety. They multiply the effects of **Hawthorn**, rich in flavonoids and manganese mineral salts, which is an outstanding de-stressor, provides global rest and reinforces the skin.

### Dermocosmetic functions and Indications

- Firms the skin and improves muscular tone
- Broken capillaries on face, excess skin overheating, spider veins.

Ideal for people with a SANGUINE TEMPERAMENT: people with a dynamic character, who are more rigid and have circulatory problems: varicose veins, spider veins, very red skin.

## Vetiver floral water

### Ingredients and their richness

Aqua · Ginkgo biloba leaf extract · Mentha arvensis herb oil · Parfum

Extracts of **Pennyroyal**, a herbaceous plant of the family of the Lamiaceae is very aromatic, relaxing and regulates body temperature (Dioscorides, Greek physician of the 1<sup>st</sup> Century said, "It has warming, slimming and digestive properties"); and **Ginkgo** leaf, an antioxidant that improves vascular function thanks to its flavonoids and organic acids and has been widely used in Chinese medicine for over 5,000 years.

### Dermocosmetic functions and Indications

- Ideal for stretch marks.
- Smokers and people who tend to suffer from couperosis and spider veins. Fragile capillaries.
- People who overheat or get cold easily.

Ideal for people with a NERVOUS TEMPERAMENT: nervous, fearing, moody, with emotional problems and "hidden fears". People with skin problems.
