

Care and natural protection of these very delicate and normally fatigued areas

Natural, balanced and organic formula, inspired by regenerative plants linked with valuable Mediterranean essences.

This is an excellent cosmetic option for the care of hands, nails and feet, as well as for manicures and pedicures.

The emulsion has a fluidly creamy feel and is easy to apply. It hydrates, soothes, protects and purifies hand and foot tissue.

Moreover, it is the natural solution for softening and smoothing the cuticle, repairing, hydrating and increasing the flexibility of nails, while also reducing their brittleness and increasing their resilience.

Ingredients and their richness

Aqua • Kaolin • Lavandula latifolia herb extract and Helianthus annuus seed oil • Cocos nucifera oil • Salvia officinalis leaf extract • Rosmarinus officinalis leaf extract • Helychrisum italicum extract • Theobroma cacao seed butter • Glycyrrhiza glabra root extract • Lecithin • Hectorite • Hamamelis virginiana bark/leaf extract • Mentha spicata herb extract • Phyllostachys viridis • Bambusa arundinacea stem extract • Lentinula edodes extract • Parfum • Glicolic acid • Sorbic acid • Tocopherol • Limonene* • Coumarin* • Citral* • Linalool* (*) from its natural essence oils

Compatible phyto-ingredients achieve the necessary and timely delivery of vitamins, minerals and proteins. Among them, we highlight:

Lavender and Rosemary, rich in rosmarinic acid and flavonoids, which exercise a joint soothing and decongesting action. **Sage and Helychrisum**, much appreciated by professional massage therapists for their soothing action on muscles and joints. **Hamamelis-Peppermint**, whose added content in polyphenols, chlorophyll and tannins increases circulation and drainage. **Bamboo and Shiitake** contribute numerous essential amino acids and minerals, improving skin regeneration. **Coconut and Cocoa** protect the lipid layer of the epidermis and avoid dryness.

The combination of aromatic plants contributes a richness of antioxidants that rejuvenate the skin during manicure and pedicure treatments. The essential oils of Eucalyptus Citriodora and Litsea provide wellness to finger joints and relax and soothe hand tension. The aromatic composition of this emulsion is purifying, reducing the darkening effect of nail polish. It provides a gentle citrus-green perfume which ensures skin flora balance and acts as a natural deodorant.

Additionally, the combination of the product's essential oils is an effective protection for the professional worker who, in his/her job, is in regular contact with hands, nails and feet, areas that are prone to fungal infection.

Dermocosmetic functions

- ✦ **Tones**, soothes, de-stresses, relaxes and increases hand and foot suppleness. Regenerates dry skin.
- ✦ **Restores** the most common skin damage to hands: ageing and irregular pigmentation.
- ✦ **Protects** nails and hand and foot skin against environmental stress, nail-deforming fungus, etc.
- ✦ **Increases skin suppleness and smoothness** by restoring the skin lipid barrier.

Indications

For all skin types and for the preventive care of nails, hands and feet in a regular and healthy state
Dry, brittle nails with side splinters, layering, flaking, scratching, etc.

Thickened and/or hardened cuticles that hide the nail lunula, totally or partially

Hands with dehydrated, rough, coarse epidermis, without elasticity or with small cracks or blemishes

Rough, fatigued, toneless, stressed, hurting feet that feel stiffened and need relaxation, etc.

Directions for use

Always shake before use.

Apply the emulsion and gently massage the cuticles (specially before removing or clipping them) and nails.

Massage repeatedly from the tip of your fingers towards the wrist (hands) or towards the instep or ankle (feet).

Repeat this operation several times a day if necessary.

The product has a light feel and absorbs rapidly, so it has no greasy afterfeel on the skin.

Both the cuticle and nail treatment and the hand and foot treatment can be performed dry or gently soaking the area you want to treat in lukewarm water.
